

What happens to your business when mission-critical systems are unavailable due to infrastructure failure, security breach, human error, or a natural disaster?

- Most businesses would be **SEVERELY** impacted
- Without a comprehensive disaster recovery plan in place, your organization faces potential loss of data, revenue, brand reputation, and customer trust

Protect your critical business technology infrastructure with disaster recovery solutions from Thrive. Exceed even the most challenging Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs) with our complete portfolio of business continuity solutions; from disaster recovery consulting and planning, to full restoration of mission-critical applications and services.

Thrive provides IT business continuity solutions that minimize data loss and provide fast, automated recovery of critical systems for protection against events that can devastate normal business operations.

Thrive's Disaster Recovery as a Service (DRaaS)

- Real-time replication of business-critical data
- Automated recovery of protected virtual servers upon declaration of a disaster
- Recovery of critical workloads to ThriveCloud, Microsoft Azure or client systems
- Non-impacting simulated testing for recovery assurance
