

# Hybrid Cloud

Secure, Flexible & Compliant

**Financial services firms understand the benefits of the Cloud: greater business agility, scalability, and responsiveness. However, what is often not fully understood is how financial regulatory frameworks apply to Cloud services and whose responsibility it is to meet those requirements. Depending on performance, privacy and cyber security often one Cloud solution isn't the answer.**

Thrive believes it's a multi-Cloud, SaaS-based world. Performance, cost, security and regulatory demands drive decisions of where FinTech applications and data best belong. Thrive's Cloud engineering team is here to design, build, and support the Cloud solution that best meets your business needs.

Thrive offers best-in-class Hybrid Cloud solutions backed by a proven track record of delivering managed Cloud services across public and private Cloud platforms. Our broad portfolio of Cloud services can be customized to seamlessly match your operational and budget requirements. ThriveCloud compliments private and public Cloud instances because we leverage the best in NextGen Cloud orchestration tools so that you have better visibility and control of both costs and workloads across your environment.

### A Full Range of NextGen Cloud Solutions from Thrive

Private, Public, or Hybrid -- no matter your path to the Cloud, Thrive can help you get there and manage the chaos for you.

- Enterprise-class Cloud platforms are VMware based built for the most demanding workloads
- Public Cloud management in Microsoft Azure or AWS
- 24x7 Monitoring, Management, and Support
- Access to Thrive's Hybrid Cloud Director with single pane of glass visibility and control of your ThriveCloud, Azure, or AWS workloads

### Hybrid Cloud Workload Advantages

#### Control Costs & Gain Value

- Eliminate the uncertainty and costly nature of infrastructure, hardware capital expenditures and refresh cycles
- Streamline operating budgets, avoid expensive and cumbersome maintenance and support renewal agreements

#### Gain More Flexibility

- Access your applications seamlessly and securely from anywhere
- Easily add or remove resources as your business requirements change
- Utilize multiple Cloud platforms to optimize performance and cost -- all managed by Thrive's expert team of Cloud engineers

#### Improve Security & Resiliency

- Fully redundant and resilient Cloud architecture providing the highest levels of availability and performance
- Secured by NextGen Firewalls, Unified Threat Management platforms, SOC/ SIEM and Distributed Denial of Service (DDoS) detection and mitigation

**SEC Cyber Examination focuses on how firms are identifying and monitoring risk to ensure firm data, and client information is secured at third parties and Cloud services providers.**

The SEC cyber sweep includes the following areas of focus:

- Vendor due diligence reviews
- Policies and procedures aligning to technology standards
- Cloud Service Provider
- Data Loss Prevention
- Data Encryption
- Identity and access management
- Risk assessment
