

**Networking speed and reliability forms the essential backbone of IT infrastructure, but maintaining and optimizing corporate networks can put significant restraints on budgets and resources.**

**You don't have to go it alone. Thrive can help you deliver Enterprise-class networking, 24x7x365.**

### Thrive's Global Network Management Services Includes:

#### Architecture & Design

- Our team of experienced and knowledgeable network engineers work closely with you to evaluate and enhance your network infrastructure, and implement a customized solution that meets the specific needs of your business and applications
- From core to edge, iSCSI to fiber channel, Layer-2 switching or Layer-3 routing, we have the expertise to architect and deploy network solutions utilizing best-of-breed technologies to fit your budget

#### Monitoring & Management

- Comprehensive 24x7x365 network monitoring and management of leading technology platforms including Fortinet, Cisco, Meraki and more
- End-to-End management of:
  - Local Area Networking
  - Wide Area Networking
  - Wireless Networking
  - Internet and WAN connections
  - Load Balancing

#### Secure SD-WAN

- Thrive's Secure Software Defined Wide Area Networking (SD-WAN) service delivers both networking and security capabilities in a unified solution providing application performance, consolidated management with advanced protection against threats
- Application aware routing to ensure critical application performance metrics are met
- Multi-path intelligence providing automated failover and load balancing
- Integrated NextGen security threat protection eliminating the need for multiple point solutions

### Why let Thrive help with your networking?

#### Control Costs & Gain Value

- Eliminate costly hardware refresh cycles with Thrive's equipment-based managed network services

#### Gain More Flexibility

- Take advantage of NextGen technologies that deliver application aware network performance while producing bandwidth cost savings

### Take the Next Step
