

## Thrive's NextGen Cloud Solutions optimize your business with these direct benefits:

### Control Costs and Gain Value

- ◆ Eliminate the uncertainty and costly nature of infrastructure, hardware capital expenditures and hardware-fresh cycles
- ◆ Streamline operating budgets and avoid expensive and cumbersome maintenance and support renewal agreements

### Gain More Flexibility

- ◆ Access your applications seamlessly and securely from around the globe 24x7x365
- ◆ Easily add or remove resources as your business requirements change.
- ◆ Utilize multiple Hybrid Cloud platforms to optimize performance and cost – all managed by Thrive's expert team of Cloud engineers

### Improve Security and Resiliency

- ◆ Experience the highest levels of availability and performance with a fully redundant and resilient Cloud architecture
- ◆ Secure your data with NextGen Firewalls, Unified Threat Management platforms, SOC / SIEM and Distributed Denial of Service (DDoS) detection and mitigation

## Legal Firm Leverages Thrive's Robust Cloud Platform to Optimize Application Delivery, Increase End User Productivity and Lower Capital Expenditures.

### CHALLENGE

Shawe Rosenthal, a Baltimore-based labor and employment law firm, was looking to update its IT architecture. The firm wanted more efficiency, security and flexibility, which their aging on-premise systems were unable to provide. Meanwhile, their existing managed services provider (MSP) was resource constrained and didn't have the capability set to move the client towards digital transformation. Shawe Rosenthal recognized that they needed a new, trusted partner to help modernize their IT infrastructure in order to accomplish their goal.

### SOLUTION

After completing a thorough assessment of the firm's needs, Thrive's engineering team determined Shawe Rosenthal's IT support structure required better redundancy, higher levels of security and the ability to provide the firm's partners with seamless remote work access. Thrive approached this challenge with a complete overhaul of the firm's systems and migration to a fully-customized Hybrid Cloud solution. During the process, Thrive consolidated the existing servers and moved Shawe Rosenthal into a modern Cloud Desktop as a Service (DaaS) platform that not only directly addressed the firm's needs, but also added the benefits of scalable storage and a comprehensive disaster recovery solution.

### RESULT

Shawe Rosenthal is now leveraging ThriveCloud, Thrive's best-in-class VMware, Cloud Service, housed in a world-class SOC2 Type II-certified data center. In addition to boosting the stability and security of the firm's IT Infrastructure, their partners now have access to their applications and data from anywhere, anytime and from any device. The robust Cloud solution also reduced capital spending by consolidating servers, resulting in a smaller footprint of on-premise devices and adding an additional level of resiliency.

Thrive now provides 24x7 monitoring, management and support of the Cloud solution - providing the firm with peace of mind that their mission critical legal applications will always be available.

*"Thrive delivered and continues to deliver the right technology and support to meet our goals and exceed our expectations. We hit a home run by selecting this team to lead and direct our Technology."*  
~ Lisa A. Mangus, Administrator

### How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive successful business outcomes with our talented engineering teams and suite of Cloud-First, NextGen Managed Services.
