

## Thrive's Cloud Workspace, is a Cloud-based virtual office that allows end users to access their virtual desktop and virtualized applications from any internet enabled location.

Thrive eliminates the hassle and expense of designing, building, running, and maintaining Virtual Desktop Infrastructure (VDI) in-house. Cloud Workspace service provides streamlined solutions for your specific business needs that help reduce capital expenditures and maximize performance.

### A Full Service NextGen Desktop-as-a-Service (DaaS) Platform From Thrive

Thrive Cloud Workspace provides Desktop-as-a-Service (DaaS), a Cloud-based service in which the back-end of a virtual desktop infrastructure (VDI) is fully hosted and managed by Thrive.

With Thrive Cloud Workspace, we provide organizations with:

- ◆ 24x7 access to desktop and applications from any device
- ◆ Simplified desktop provisioning or migration
- ◆ Ability to reduce costs, increase data security, and disaster recovery capabilities

### Gain Greater Flexibility and Agility

- ◆ Support new business initiatives more quickly
- ◆ Simplify VDI initiatives - focus on applications and data, not the platform
- ◆ Manage multiple applications, versions of software and online services from one location
- ◆ Cut costs by eliminating purchasing of expensive hardware (Servers, DR, Backup Appliances). Thrive offers a best-in-class Desktop-as-a-Service (DaaS) platform to accelerate delivery of virtual applications and desktops to your end users leveraging private or private cloud

### Improve Security, Compliance and Resiliency

- ◆ Move your servers out of the office to free up space
- ◆ Implement 2FA or MFA (Multi-Factor Authentication) on both email and desktop

### Cloud Workspace Features:

- Fully managed virtual desktops and servers enable your end users to access their desktop applications and data from their compatible devices at any internet enabled location.
- Provides a consistent desktop and application delivery experience to your users, regardless of their location or access device while providing the flexibility to customize desktops and applications based on department or organizational needs.
- Management of desktop applications is simplified from having to install, license, and manage multiple end user devices to delivering a shared or dedicated cloud based workspaces that are fully managed by Thrive.
- Cloud Workspace is available on Thrive's secure, private cloud platform featuring redundant and resilient cloud servers with high performance storage and networking or it can be delivered in public cloud on Microsoft Azure.
- Cut costs by eliminating purchasing of expensive hardware (Servers, DR, Backup Appliances).
