The Thrive Advantage

At Thrive, we are IT experts with decades of experience managing security for the enterprise. We specialize in protecting the internet infrastructure, applications, and Cloud platforms that power your business. Put the resources of one of the top North American managed services providers (MSPs) to work for your company with Thrive's Managed Security Suite of Services.

Our Security Operations Centers (SOCs) are staffed by technical experts focused on all aspects of cyber security to provide even more protection and advanced resources for your business. From essential security services to a deeper set of full-spectrum advanced engineering coverage, Thrive provides flexible options to meet any compliance or security driven mandate.

Features Include:

- **NOC and SOC Monitoring –** Threats never rest, and neither do we. Thrive's 24x7 NOCs and SOCs monitor core critical infrastructure and security threats for businesses across the globe

- **Flexible Solutions –** Unbundled managed services enable you to create a solution tailored to your exact needs, utilizing leading technology from Fortinet, Microsoft, Cisco, Mimecast, Arctic Wolf, Sophos, Qualys and more, ensuring that your business has Enterprise-grade security

- **Security Experts –** Thrive's Security Operations Centers are staffed by experienced CISSPs and security professionals with decades of experience protecting mission critical infrastructure
