

Thrive's Cyber Security Bundle leverages best-in-class technologies to deliver a holistic end user security solution that helps prevent against ransomware, data exfiltration, and social engineering attacks.

With the recent increased shift to a remote workforce, ensuring endpoint and end user security becomes more challenging and requires a multi-layered approach. Thrive's Cyber Security Bundle addresses these challenges to provide protection against these threats to your end users and organization:

- ◆ Malware
- ◆ Social Engineering
- ◆ Phishing
- ◆ Ransomware

People are the weakest link in the security chain and human error is the leading cause of data breaches. As attacks become more widespread and sophisticated, end user protection and education are key security measures that can mitigate against costly data breaches that result in monetary loss, loss of productivity, and brand damage.

Features & Benefits:

- ◆ Thrive 24x7x365 Security Operations Center (SOC) Monitoring
- ◆ NextGen malware protection against data exfiltration and ransomware
- ◆ Comprehensive Email Threat Security
- ◆ Advanced Protection against malicious URL's
- ◆ Managed Anti-Phishing and Security Awareness Training
