

## Thrive has the expertise and experience to accelerate IT transformation for your business.

As technology exists at the core of success for every business, cyber security strategy combined with our team of industry professionals allow you to understand current state, perform risk mitigation, and create a roadmap for the future. No matter the technology challenge or objective, Thrive's consultants understand current challenges in the business landscape combined with a deep understanding of cyber security related threats. Thrive's experience working with companies in every vertical, from Healthcare providers to Financial Services firms, will provide the resources you need to best understand how technology is serving the organization, prepare for regulatory or M&A related activities, or provide additional expertise to your team with a vCIO or vCISO resource on an executive-for hire basis.

From short- and long-term IT projects to ensuring you have the team and expertise in place to meet your most strategic objectives, Thrive addresses gaps that may exist in your organization by providing a variety of expert professional and consultative services.

### Technology Operations

A comprehensive assessment articulating how technology serves the business including current state analysis compared to accepted best practices, risk identification, and specific recommendations to maintain systems availability and protect company data.

- ◆ Cloud
- ◆ Server & Network Infrastructure
- ◆ Endpoint Management
- ◆ Backup & Disaster Recovery
- ◆ Workforce Collaboration
- ◆ Cyber Security
- ◆ Technology Governance

### Cyber Security Risk

Thrive's Cyber Security Readiness Assessments evaluate cyber security posture and risk mitigation tools against the Center for Internet Security's (CIS) 18 control areas to provide a comprehensive picture of the client's current risk profile while developing a strategic roadmap for the future.

- ◆ Thrive's vCISO is an (ISC)<sup>2</sup> certified trusted advisor
- ◆ Review of existing policies, controls, and compliance oversight
- ◆ Center for Internet Security (CIS) framework implementation
- ◆ Information security governance and compliance oversight
- ◆ Third-party partner due diligence initiatives
- ◆ Ongoing cyber security program validation

### Virtual CISO

Thrive vCISO experts design, develop, and maintain a customized Information Security Program that complements your business strategy and risk tolerance. This service offering leverages ISACA's Certified Information Security Manager (CISM) Knowledge Domains (and associated Tasks) and the Center for Internet Security (CIS) framework, as a basis for the types of activities to be performed by the Thrive vCISO.

- ◆ Industry-leading information security program management
- ◆ Thrive's vCISO serves as trusted security advisor
- ◆ Information security governance and compliance oversight
- ◆ Information security program reviews
- ◆ Review of existing policies, controls, and security toolsets
- ◆ IT Management remediation plans
- ◆ Prioritized improvements for IT Management
- ◆ Incident response preparedness and annual incident response table-top exercise
- ◆ Center for Internet Security (CIS) framework implementation

### Virtual CIO

Virtual CIO provides technology strategy, leadership, and insight to meet business needs moving IT forward, faster.

- ◆ IT Governance and Process Creation
- ◆ Project Management of internal non-Thrive initiatives
- ◆ Interim leadership resources
- ◆ Strategic approach to best serve business needs
- ◆ Third party vendor management
- ◆ Business Process Consulting
- ◆ Flexibility to meet unique customer requirements

## The Thrive Advantage

### An Experienced Partner in Empowering NextGen IT

As IT management continues to evolve, it is no longer about expanding digital infrastructure operations from inside the traditional office walls to the Cloud, but rather, going far beyond.

Thrive understands the opportunities and challenges that growing businesses face as they look to accelerate transformation and achieve NextGen IT.
