Corporate Overview

A Trusted Partner of Financial Organizations

At Thrive, our team of professionals is comprised of technology experts with decades of experience providing NextGen technology services to a variety of organizations in the financial services industry. We have a long history of servicing some of the largest hedge funds, financial services companies, private equity firms, as well as many of the top regional banks in the Northeast.

Thrive understands the unique complexities organizations face each day from investors, regulators, and customers. From industry-tailored Cloud and cyber security services to a world-class Financial Services-specific IT platform, Thrive is uniquely positioned to meet the demands of the financial industry. Our compliance and regulatory expertise on SEC, state-enforced regulations, and FINRA is your digital compass to improve business operations and future-proof digital infrastructure operations.

NextGen Managed Services for Financial Organizations

Digital Transformation Through Collaboration

Digital transformation will continue as the years go on, and you need the software, hardware, and connectivity solutions to keep up. Digital collaboration platforms, such as Microsoft 365, SharePoint, Microsoft Azure, and Teams, will continue to transform work as we know it.

Thrive has helped financial organizations of all sizes adopt the tools available in the Office 365 platform to empower employees, optimize operations, and ultimately, transform their businesses.

Hybrid Cloud, Private Cloud and Public Cloud

Performance, cost, security, and regulatory demands drive decisions for where financial applications and data should reside. This often leads to some confusion around how financial regulatory frameworks apply to Cloud services and whose responsibility it is to meet those requirements.

Thrive offers a broad portfolio of Hybrid Cloud solutions backed by a proven track record of delivering managed Cloud services across public and private Cloud platforms. Our Cloud engineering team has the ability to design, build, and support the Cloud solution that best meets the needs and regulatory requirements of your specific business.

Managed SIEMaaS

To ensure security and mitigate risk as well as meet regulatory requirements, financial services organizations need a comprehensive Security Incident and Event Management (SIEM) solution.

Thrive has developed SIEM-as-a-Service (SIEMaaS) that scales with budgets, can flexibly meet changing demands, and provides clear, actionable information.

Disaster Recovery-as-a-Service

To protect your critical infrastructure, Thrive offers disaster recovery-as-a-service (DRaaS). Our portfolio of services range from disaster recovery consulting and planning to full restoration of mission-critical applications and services.

Vulnerability Management

Thrive is here to assist your organization with comprehensive Vulnerability Management offerings. Our team can help protect your business by uncovering IT vulnerabilities and delivering unmatched insight into the potential risks present in your mission-critical infrastructure.

The Thrive Platform

The Thrive Platform, powered by ServiceNow, optimizes your IT service delivery and application environment to create better business outcomes, increase ROI & make internal IT teams more successful with automation and self-service.

Built and managed by a dedicated expert team at Thrive, The Thrive Platform makes life better for everyone with custom workflows and easy-to-follow instructions.
