SERVICES

- ◆ Helpdesk Endpoint Management
- ◆ M365 Management
- ◆ O365 Backup
- ◆ Cyber Security Bundle
- ◆ Managed SIEM / SOC 24x7
- ◆ Global Relay Message Archiving Compliance
- ◆ Azure Infrastructure
- ◆ Virtual Desktop

CHALLENGE

The start-up hedge fund with a team working remotely across the U.S. did not have a fool-proof or future-proof plan for streamlining its operations and securing its communications and data.

The company searched for a partner to create a strategic IT plan, providing a full cyber security solution with expert direction for its rigorous day-to-day technical and investment analysis.

SOLUTION

The hedge fund turned to Thrive to create a strategic roadmap for securing and managing its cloud-based trading platform. Thrive implemented a comprehensive managed cyber security solution bundle to protect the entire IT environment, from endpoints to the Cloud, and everything in between. Thrive deployed Security Incident and Event Management as a Service (SIEMaaS), providing access to its fully-staffed, 24x7x365 security operations center (SOC) for constant monitoring of threats, and set up a help desk for endpoint management. Thrive also installed an Azure infrastructure, Global Relay message archiving compliance, Office 365 backup, and Microsoft 365 management.

RESULT

Thrive's tailored managed cyber security solutions offered end-to-end protection of the hedge fund's systems and data, alleviating the burden on its internal IT teams. Thrive executed a hybrid approach of using automation for speed and responsiveness and an expert staff for intelligent problem-solving and lasting solutions that are delivered around the clock from Thrive's SOC. As a result, the hedge fund now has a secure and scalable IT ecosystem that can grow with the company and its IT demands.

How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
