

# A premier golf resort, spa and conference center selects Thrive to upgrade its aging IT infrastructure.

CASE STUDY

## VERTICAL

Hospitality

## SERVICES

- ♦ EMBS Firewall and Switches
- ♦ Workstation Patching
- ♦ Security Awareness Training
- ♦ Email Security
- ♦ Server Management and Backups

## CHALLENGE

The elite golf resort is an ideal destination for community banquets, corporate meetings, weddings, conferences, and more. The resort's internal IT team was overworked and frustrated, trying to manage and scale outdated IT network systems. The company is family-owned and never outsourced any technology, but decided it was time to seek help to enhance their operations.

## SOLUTION

The company selected Thrive, a trusted IT security and operations partner for the hospitality industry, to provide expertise and support before, during and after the customized solution implementation. Thrive's engineering team met with the resort's internal IT department to develop a highly detailed plan, covering immediate and long-term infrastructure, Cloud security, and end-user security needs. Thrive provided managed firewall and switches; workstation patching; security awareness training; Cloud cyber security services for email, data, and web; and server management and backups.

## RESULT

The IT infrastructure measures put in place by Thrive enable the resort to leverage state-of-the-art security technology to relieve strain on its internal IT team. Thrive's Security Operations Centers (SOCs) are staffed by technical experts around the clock to monitor the resort's environments and respond to potential threats. The resort is also able to tap into Thrive's unmatched portfolio of cyber security services, expertise, and resources as the company's technology needs continue to evolve.

## How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
