

# Private Equity Firm selects Thrive's Managed Services to scale its IT infrastructure and security to accommodate company growth.

## CASE STUDY

### VERTICAL

Private Equity

### SERVICES

- ◆ ThriveCloud
- ◆ Security Incident and Event Management as a Service (SIEMaaS)
- ◆ IT Infrastructure
- ◆ 24x7x365 security operations center (SOC)
- ◆ Global Relay Message Archiving Compliance
- ◆ Endpoint Management
- ◆ O365 Management, Licensing and Backups

### CHALLENGE

A private equity firm, which has been in business for 20 years, outgrew its smaller managed services provider (MSP). The firm was rapidly adding more investment companies to its portfolio and felt the current MSP would not be able to scale with its growth projections.

### SOLUTION

The private equity firm turned to Thrive, a trusted managed services provider, to address technology advancements and risk mitigation for its continued growth. Thrive implemented several solutions that met a wide range of stringent compliance requirements while also protecting the firm with cutting-edge cyber security measures. Thrive applied its Security Incident and Event Management as a Service (SIEMaaS), a fully managed and hosted IT infrastructure monitoring platform, with access to its fully-staffed, 24x7x365 security operations center (SOC) to monitor for any potential threats. Thrive experts provided endpoint management, managed ThriveCloud server infrastructure and backups, global relay message archiving compliance, endpoint management, and full management of Office 365 from licensing to backups and more.

### RESULT

Thrive leveraged the best practices established in its 20-year history working with hundreds of PE firms and PE-backed companies. The comprehensive Office 365 infrastructure and cyber security bundles delivered by Thrive create a future-proofed, compliant, and secure environment to accommodate the predicted company's growth. The private equity firm also utilizes Thrive's technical account manager and a team of expert consultants to assist at every stage of the investment lifecycle.

### How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
