

The Cloud era promises greater business agility, scalability, and responsiveness, but one size does not fit all when it comes to choosing Cloud platforms that best meet your business and financial objectives. Often times one Cloud isn't the answer.

Thrive believes it's a multi-Cloud, SaaS-based world. Performance, cost, security and flexibility drive decisions of where business workloads best belong. Thrive's is here to design, build, and support the Cloud solution that best meets your business needs.

Thrive offers best-in-class Hybrid Cloud solutions backed by a proven track record of delivering managed Cloud services across public and private Cloud platforms. Our broad portfolio of Cloud services can be customized to seamlessly match your compliance, operational and budget requirements. ThriveCloud compliments public Cloud instances because we leverage the best in NextGen Cloud orchestration tools so that you have better visibility and control of both costs and workloads across your environment.

A Full Range of NextGen Cloud Solutions from Thrive

Private, Public, or Hybrid – no matter your path to the Cloud, Thrive can help you get there and manage the chaos for you.

- ◆ 24x7 Monitoring, Management, and Support

THRIVE CLOUD™

As IT management continues to evolve, it's no longer about expanding digital infrastructure operations from inside the traditional office walls to the Cloud. Rather it is about extending that experience to the Cloud and beyond. ThriveCloud is an enterprise platform that offers the highest performance in security and efficiencies that Enterprise-class business applications deserve. The ThriveCloud platform offers the stability and power of Enterprise-class Cloud infrastructure, customized to meet your exact needs.

- ◆ 24x7 Monitoring, Management and Support
- ◆ Virtual Server Hosting and Management
- ◆ Hybrid Cloud Integration Capabilities
- ◆ Cloud-based Data Protection

Azure

Unlock the capabilities of your applications with Thrive's managed Azure Cloud services. Thrive's team of Cloud engineers and Azure experts can take infrastructure management to the next level and relieve your team of the 24x7 burden of managing workloads beyond the office walls. Thrive has the power to transform your business within Microsoft Azure or within any hybrid Cloud environment.

- ◆ The modern and flexible Cloud platform for businesses
- ◆ Thrive's layered Microsoft Azure expertise and management
- ◆ Scales upon demand

The Thrive Advantage

Control Costs & Gain Value

- ◆ Eliminate the uncertainty and costly nature of infrastructure, hardware capital expenditures and refresh cycles
- ◆ Streamline operating budgets, avoid expensive and cumbersome maintenance and support renewal agreements

Gain More Flexibility

- ◆ Access your applications seamlessly and securely from anywhere
- ◆ Easily add or remove resources as your business requirements change
- ◆ Utilize multiple Cloud platforms to optimize performance and cost – all managed by Thrive's expert team of Cloud engineers

Improve Security & Resiliency

- ◆ Fully redundant and resilient Cloud architecture providing the highest levels of availability and performance
- ◆ Secured by NextGen Unified Threat Management Firewall platforms, SOC/ SIEM and Distributed Denial of Service (DDoS) detection and mitigation
