THRIVE℠

Ransomware

Ransomware attacks are at an all-time high. The rapidly shifting landscape in data extortion methods by cybercriminals can make it difficult to protect your company's assets and data. That's why a comprehensive, proactive security strategy in tandem with technology solutions is imperative.

Ransomware is one of the biggest forms of cybercrime that organizations face today and it is growing at an alarming rate.

Ransomware is a form of malicious software – malware – that encrypts files and documents on anything from a single PC all the way up to an entire network, including servers. The accelerated remote workforce has also created new and dangerous vulnerabilities to IT networks.

- **60%** of companies victimized by ransomware experienced revenue loss.
- It's estimated that a ransomware attack occurs every **11** seconds.
- About **1 in 6,000** emails contain suspicious URLs, including ransomware.
- The average downtime a company experiences after a ransomware attack is **21 days**.
- Ransomware attacks increased **64%** year-over-year.
- The U.S. is still by far the most targeted country, with **54.9%** of total victims.
