

Anti-Phishing & Security Awareness Training

Security threats and attacks come in many different forms. Protecting your assets and data requires more than technology solutions. User awareness of these threats and how they are executed is a key component of a comprehensive approach to security.

Thrive's Anti-Phishing and Security Awareness Training service provides ongoing security testing and training for your users to increase awareness of risks associated with phishing, spear phishing, malware, ransomware and social engineering attacks with targeted user campaigns and responsive training aimed at improving awareness of and avoiding security threats. Improving user awareness of these threats reduces risk of human error resulting in security breaches and ransomware. security programs, computer systems, end users, personal information, and critical infrastructure from unauthorized access.

91%

of data breaches originate from a phishing email

80%

of Hacking Related Breaches Leverage Compromised Passwords
