SERVICES

- ◆ Helpdesk
- ◆ Managed Endpoint Security and Response
- ◆ Managed Firewall
- ◆ Global Network Management

CHALLENGE

The largest school in a major northeast metro needed a solution to manage, support, and secure a huge demand for online student learning devices, such as iPads and Chromebooks.

SOLUTION

The PK-12 school has relied on Thrive to support its IT services for more than a decade and turned to Thrive once again to accommodate its growing need for online learning devices. Thrive's experts implemented Thrive's Managed Endpoint Security and Response service, powered by Fortinet's FortiEDR platform, the only endpoint protection platform that delivers threat protection both pre-and post-infection in real-time. Thrive also provided firewall solutions to fortify the school's IT network and a global network management service to operate and maintain the network infrastructure at optimal performance.

RESULT

The school was instantly able to accommodate the demand for online school learning devices for all students. In addition, Thrive delivered unmatched managed IT support with its wide range of helpdesk solutions, so the school could gain confidence and support in their IT infrastructure while experiencing new innovative solutions in place.

How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
