

A premier safety services firm selects Thrive to improve security and prime IT infrastructure to accommodate growth.

CASE STUDY

VERTICAL

Healthcare

SERVICES

- ◆ Migration of file server content to SharePoint
- ◆ ThriveCloud
- ◆ Managed Office 365
- ◆ End-user Security Bundle
- ◆ vCISO Services

CHALLENGE

A safety, health, and rescue services firm operating for more than three decades in the northeast U.S. needed to leverage new technologies to support the growth of the business with enhanced security measures and reduced dependence on its on-premise infrastructure.

SOLUTION

The safety services company is a long-standing customer of Thrive. Thrive experts worked with the company's management team to implement state-of-the-art technology to simplify and streamline operations with enhanced security. Thrive migrated the company's file server content to SharePoint, relocated on-premises servers to ThriveCloud, implemented Managed Office 365, installed an End-user Security Bundle to protect against cyber threats, and deployed Thrive's vCISO services to provide security oversight and governance.

RESULT

Thrive provided a custom solution that complemented the safety services company's business strategy and risk tolerance. The company is now positioned for further growth by moving operations to a scalable IT infrastructure with Cloud, cybersecurity and vCISO services. The continuous monitoring of cybersecurity along with end-user training also reduces strain on in-house IT staff and resources.

How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
