

A major manufacturer and distributor of industrial chemicals partners with Thrive to grow its IT infrastructure, enhance security, and increase employee security awareness.

CASE STUDY

## VERTICAL

Manufacturing

## SERVICES

- ◆ Managed Server Patching
- ◆ Managed Anti-Phishing
- ◆ End-User Security Training (per user) for 850 seats

## CHALLENGE

The manufacturer and distributor was at a pivotal point in its operations to increase security and employee adoption of digital transformation. Specifically, the company was searching for a trusted advisor to train its user community and mature its server patch process to enhance and secure its operations.

## SOLUTION

The Thrive team of experts presented several solutions involving security, digital transformation, and Microsoft management. Thrive delivered its Managed Server Patching and Managed Anti-Phishing solutions for a more flexible, future-proof, and secure IT infrastructure. In addition, Thrive leveraged its patching engineers for continued collaboration around Digital Transformation and Microsoft management. To increase employee adoption of these initiatives, Thrive deployed End-User Security Training for each of the manufacturing company's employees.

## RESULT

The updated IT infrastructure now supports more scalable and secure operations for the manufacturing company. Thrive's managed security services will keep up with the changes in system updates, company policies, and new threats. The End-User Security Training will increase the company's employees' ability to keep the organization secure and enables staff members to recognize these dangers and handle various security incidents, mitigating the risk of cyberattacks.

## How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
