

Streamline and secure your remote, flexible and global workforce with a holistic, integrated Mobile Device Management (MDM) solution to ensure compliance for mobile devices and workstations.

Enterprises today are seeing an influx of employees using mobile devices to carry out corporate tasks and access corporate resources. It is vital that businesses adopt an MDM solution as an overall management strategy to ensure compliance for your mobile devices and workstations.

Without the benefits of mobile device management, devices go unsecured, sensitive information is left vulnerable to theft, and exposure to malware and other viruses critically increases. If a company falls prey to a data breach because of mobile device mismanagement, IT costs will skyrocket.

Thrive offers a best-in-class Mobile Device Management (MDM) solution that provides centralized control over all mobile devices within an organization on one platform. Our MDM services ensure that your sensitive company data used on a mobile device, whether provided by your business or brought in by staff, can be fenced off to protect and secure the data.

A Full Service NextGen Mobile Device Management (MDM) Platform From Thrive

Thrive's Advanced Mobile Device Management allows organizations to deploy applications and enforce policies on endpoint devices, including smartphones and tablets.

With Thrive's Advanced MDM services, we provide organizations with:

- ◆ Enrollment of existing and new users to the MDM platform
- ◆ Establishing and modifying settings to conform with company security policies, including passcode enforcement
- ◆ Establishing and modifying settings for automatic e-mail profile configuration and Wifi access
- ◆ Remote wipe of devices
- ◆ Deployment of security profiles based on available MDM feature set
- ◆ Application deployment
- ◆ MDM platform connection to Apple DEP and VPP platforms

The Thrive Advantage:

At Thrive, we are IT experts that specialize in protecting the internet infrastructure, applications, and Cloud platforms that power your business. Put the resources of one of the top North American managed services providers (MSPs) to work for your company with Thrive's Mobile Device Management (MDM) services.

Our team is staffed by experts focused on all aspects of cybersecurity to provide even more protection and advanced resources for your business. From essential security services to a deeper set of full-spectrum advanced engineering coverage, Thrive provides flexible options to meet any compliance or security driven mandate.
