Vulnerability Scanning & Management

Mitigate Network & Software Security Threats

Business systems continue to grow in complexity, and with that comes increased risk of vulnerabilities, exploits, and security breaches.
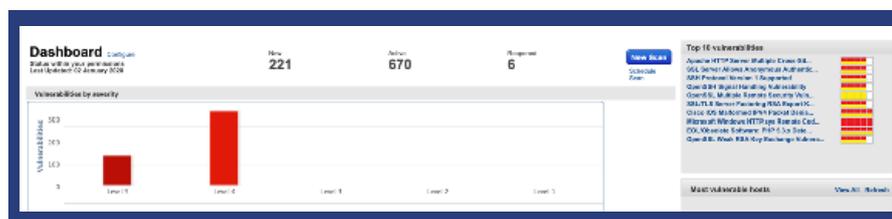

Vulnerabilities in IT systems and software code can provide hackers and criminals access to your critical systems and sensitive data, and exploits can provide a launching pad for attacks inside and outside your organization. Thrive's Vulnerability Scanning & Management service is designed to meet the ever-growing need to assess and report on network and software vulnerabilities.

Backed by 24x7x365 Security Operations Centers, Thrive has the cybersecurity resources and technology platforms your business can count on to discover potential security gaps and develop a plan of action to remedy and mitigate threats.

Features

Thrive's Vulnerability Scanning & Management includes scanning the critical systems that power your business, and delivers comprehensive reporting and actionable data that can:

- Greatly decrease the existing vulnerabilities in your environment
- Provide actionable data to keep exploits to a minimum
- Provide high level insight into existing and emerging threats
- Discovery and classification of hardware and software assets for scanning
- External scanning for up to 256 IP addresses
- Internal scanning of discovered systems and devices
- Post-scan vulnerability assessment meeting with Thrive cyber security specialists and client team to review results and assess risk to the organization
- Client dashboard with visibility into scan results and discovered potential vulnerabilities

The Thrive Advantage

Managed Services Provider (MSP)
Thrive provides Comprehensive IT Outsourcing, delivering end-to-end managed services and unmatched expertise to drive a highly secure and successful digital transformation.

Security Solutions
Thrive's fully-integrated managed cybersecurity solutions provide a proactive and comprehensive approach to security management for identifying and remediating security issues. Thrive's unified cybersecurity platform enables Thrive's 24x7x365 Security Operations Center to automatically address critical security issues without client intervention.

Consulting
Thrive addresses gaps that may exist in your organization by providing a variety of expert professional and consultative services with an agnostic approach to identifying and prioritizing risk.

Expertise
The Thrive team is composed of technical and industry experts dedicated to ensuring that customers are able to optimize their business performance through the strategic design and implementation of a NextGen IT environment.
