

Managed Governance, Risk, & Compliance

Abacode Compliance Services Align Security, Compliance, and Strategic Value

Compliance programs are often perceived as cumbersome, resource-intensive, and overly-complex, adding a rigid layer of bureaucracy over vital business processes and data. Abacode Governance, Risk, and Compliance (GRC) services streamline and simplify compliance management. Through expert consultants and robust security technologies, we provide specialized outcome-driven governance programs that transform compliance challenges into competitive advantages.

Meeting industry standards isn't just about avoiding fines. By maintaining compliance, you build trust, protect your reputation, and set your business apart as a reliable and credible partner, creating a comprehensive advantage for your business.

Reaching the Goal of Continuous Compliance

The concept of continuous compliance shifts the idea of compliance from being periodic, static assessments to a state of being. Through processes and governance, continual compliance helps keep your organization secure and resilient.

Abacode GRC services help you define and set up a continuous compliance program through a comprehensive, hands-on consultation with experts in your specific framework. We carry you through the entire certification process, and then into continuous compliance.

Phase 1: Baseline Assessment

- Conduct interviews
- Evaluate current IT environment and processes
- Report on current state and create guidance to meet standards

Phase 2: Program Implementation

- Develop required policies
- Create an implementation roadmap
- Set up compliance portal for continuous monitoring

Phase 3: Audit and Certification

- Prepare for audit
- Provide audit support
- Work as liaison and expert advisor through audit process

Phase 4: Continuous Compliance

- Monitor systems against baselines and requirements
- Manage compliance documentation
- Review and update policies and assessments annually

Only 37%

of executives are confident
that they can track their
company's compliance
program effectiveness.

Real-Time Insights at Your Fingertips

Abacode GRC services focus on outcomes – improved security posture, responsiveness, and insights – rather than checkboxes and lists. A central aspect of this is the compliance portal, combined with the Thrive Client Portal. These tools provide real-time visibility into your IT infrastructure and processes.

The compliance portal is the heart of compliance services:

- Integrated task automation
- Centralized storage for key compliance documentation and evidence
- Security monitoring and dashboards

This simplifies compliance maintenance and offers instant clarity into your compliance and security status.

Supported Regulations and Frameworks
