

# BlueSky IT Partners and Thrive Partner to Improve Cybersecurity Posture at Nova Medical Center

## Vertical

- Healthcare

## Term

- 38 Months

## MRR

- \$34K

## Services

- Technical Account Management
- Endpoint Security & Support
- Managed SIEM & SOC (24x7)
- Private Cloud
- Disaster Recovery as a Service
- Managed Web Application Firewall (WAF)
- Vulnerability Management & Scanning

## Problem

Nova Medical Centers was looking to build a scalable and secure platform for core business applications and mature overall IT security posture. These initiatives included securing end-user computing environments, migrating and securing core business applications, and bringing overarching security solutions to the business.

## Solution

Thrive engaged in a number of strategic conversations with Nova Medical Centers to better understand where business risk could be mitigated with our services. Thrive will be migrating core business applications to our best of breed private cloud solutions, positioning a defense in depth approach to cyber security, and providing disaster recovery as a service.

## Result

Nova Medical Centers will have far lower exposure to ransomware attacks and other exploits that often cause extended outage of core services. These ultimately lower business risk and improve insurance premiums.

## Grow Your Business With Thrive

Thrive is a leading provider of NextGen Managed Services designed to drive business outcomes through application enablement and optimization. We take pride in working side by side with best-in-class channel partners in the US.
