A large entertainment labor union turned to Thrive to advance and secure its on-prem infrastructure and IT operations.

CASE STUDY

THRIVE℠

VERTICAL
Entertainment - Labor Union

SERVICES
- Managed SIEMaaS with SOC
- Office 365 Monitoring
- Endpoint Security & Response
- Vulnerability Scanning

CHALLENGE

A labor union representing more than 55,000 theater and stage production workers needed an IT monitoring solution that was automated and agentless with the ability to streamline operations. The association was concerned about its current vendor that implemented antiquated solutions and the upgraded technology it presented wasn't vetted. The labor union searched for a better and more advanced solution.

SOLUTION

The Thrive team of experts implemented a robust suite of cybersecurity and IT monitoring solutions that are fully managed with the ability to view its on-prem infrastructure via one pane of glass. Thrive deployed its Security Incident and Event Management as a Service (SIEMaaS), a managed and hosted IT infrastructure monitoring platform that provides real-time context and intelligence alerts for a complete threat assessment. Thrive experts provided Managed Firewall solutions and its Managed Endpoint Security and Response service for pre- and post- threat detection and infection in real time. Thrive's Vulnerability Scanning solution was added to scan the critical systems that power the labor union to deliver comprehensive reporting and actionable data. Thrive also provided access to its fully-staffed, 24x7x365 Security Operations Center (SOC) to continuously monitor for any potential threats. In addition, Thrive delivered Office 365 mailbox monitoring for the labor union's users.

RESULT

The labor union has peace of mind with Thrive's comprehensive cybersecurity strategy that covers the labor union's vital data, applications, end users and critical infrastructure. The NextGen infrastructure Thrive provides allows the labor union to streamline and secure its staff, resources, and data while maintaining control and visibility of its IT operations.

How can Thrive help your business?
