Legal

SERVICES
- Data Protection (DPaaS)
- Cloud
- Azure Backup Copy
- Office 365 Licenses
- Security as a Service, including Vulnerability Scan, SIEM, IDS, MFA, and SentinelOne

CHALLENGE

The law firm, with two Florida offices and 19 satellite locations across the country, was expanding and dealing with end-of-life services and required IT infrastructure updates. The firm relied on a physical infrastructure with limited disaster recovery capabilities in the event of a crisis, including hurricanes. Limited power resilience capabilities could spell disaster for the law firm responsible for safeguarding critical documentation.

SOLUTION

Thrive delivered a strategic roadmap to move to the Cloud, which enabled advances in hardware and software services that former systems couldn't offer. Thrive's Cloud solutions provided the high availability, security and stability the law firm operations demanded. Thrive also migrated the firm to a Virtual Private Cloud network to eliminate previous routing issues and moved session hosts inside the Cloud to SSD for more speed, reliability and flexibility in remote environments. Managed Services to the Virtual Private Cloud were added to enable Thrive to handle the monitoring, alerting, AV, Patch Management and server support.

RESULT

The law firm says its infrastructure is the most reliable and secure it's ever been due to the Cloud and feels genuinely prepared for the risks of working online in today's IT landscape. By trusting Thrive to manage its data, the law firm's IT team can focus on more critical items in a growing company while Thrive handles compliance requirements and security. Thrive later added both Security-as-a-Service (SaaS), vulnerability scans, managed threat protection and offsite backups to Azure to protect against ransomware attackers.

How can Thrive help your business?

Thrive is a leading provider of NextGen Managed Services designed to drive business outcomes through application enablement and optimization. To learn more about our services, contact us at 866.205.2810 or info@thrivenetworks.com.
