

The Trusted Global Technology Outsourcing Choice for Financial Services Companies

Perform, Scale, and Compete

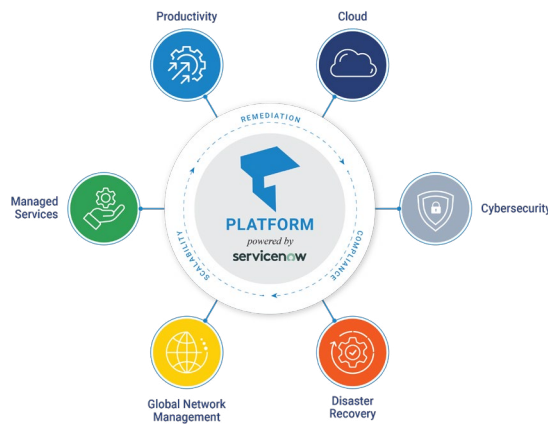

With a 20-year+ track record of supporting the strategic technology needs of financial services, Thrive offers a unique blend of managed services and consulting to ensure security, compliance, and performance.

Thrive is the world's largest Managed Service Provider (MSP) and Managed Security Services Provider (MSSP) to the financial services industry.

Thrive's unique combination of white glove support, financial industry expertise and automated technology provides customers with a strategic and competitive advantage as they look to scale and succeed.

The Thrive Platform

Thrive delivers global technology outsourcing for cybersecurity, Cloud, networking, and other complex IT requirements. Thrive's NextGen platform enables customers to increase business efficiencies through standardization, scalability, and automation, delivering oversized technology returns on investment (ROI). They accomplish this with advisory services, vCISO, vCIO, consulting, project implementation, solution architects, and a best-in-class subscription-based technology platform. Thrive delivers exceptional high-touch service through its POD approach of subject matter experts and global 24x7x365 SOC, NOC, and centralized services teams.

Our unified Financial Operations Platform enables organizations to put investors at ease, as well as serves as a comprehensive tool during a potential regulatory or registration process with the FCA, MAS, HKMA, SEC, FINRA, SIPC, MSRB and NFA.

Managed Detection and Response

Critical security issues pose a 24x7 risk to the infrastructure of financial services organizations. At the same time, system and regulatory requirements demand that organizations log, monitor, analyze and report on their data as it passes through a complex network of IT infrastructure and applications. Thrive's customer-first cybersecurity approach provides custom Managed Detection and Responses (MDR) that can scale with budgets, can flexibly meet changing demands, and provides clear, actionable information.

Disaster Recovery-as-a-Service

Thrive understands that regardless of the reason, downtime for financial services firms is never an option. Whether it's an infrastructure failure, security breach, human error, or a natural disaster, your investors and clients demand your services continue to operate without interruption.

Thrive's DRaaS portfolio of services range from disaster recovery consulting and planning to full restoration of mission-critical applications and services.

Did you know...

Thrive's Financial Services division derived directly from the internal IT team of a multi-billion dollar hedge fund back in 2007. This comprehensive and institutional foundation is now part of an expansive global team of ex Financial Services professionals, CTOs, and decision makers, and enables this specialist division to offer industry specific services and strategic advice across the globe. Through first-hand sector experience of launching and working with many start-up firms, through to advising and supporting many mature firms on their Digital Platform journey, Thrive is able to leverage this unique internal group to offer a tailor-made Financial Services offering regardless of sector, strategy, size, or complexity, all delivered in-line with the expectations of Global Financial Services regulators and investor due diligence.

Who We Serve

A Global Leader in Technology Support

Thrive stands as a global leader in technology support for financial businesses. Our comprehensive range of services and unparalleled expertise drives highly secure and successful digital transformations, making us the go-to choice for Financial IT Solutions. With a dedicated team of technical and industry experts, Thrive ensures that the financial services industry can optimize its business performance through strategic design and implementation of NextGen IT environments.

It's not enough to just have clients in an industry and declare yourselves experts. Thrive aligns our teams to make sure each and every financial services client has a team that knows their industry, technology stack, and their company inside and out. Our POD approach drives better strategies, better service, and better support from day one.

Located Where You Need Us

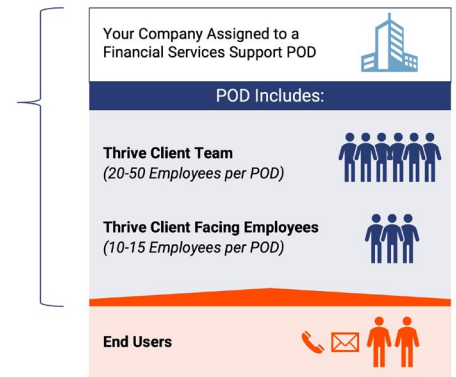

Our expansive network of 28 locations across the US, UK, Canada, Australia, and Asia reflects our commitment to providing localized support to financial services businesses around the world. Each location is staffed with highly skilled experts with deep knowledge of the industry, dedicated to delivering the highest quality services to PE firms, hedge funds, venture capital firms, banks, and more.

“Thrive’s expertise enhanced our IT operations, aligning technology with our business objectives. We have peace of mind knowing that we are following industry best practices.”
