Hybrid Cloud Director

HYBRID CLOUD DIRECTOR
BY THRIVE

**Thrive's Hybrid Cloud Director provides clear visibility and management of multi-Cloud workloads across ThriveCloud, Azure, AWS and on-premise deployments. It's an easier way for businesses to manage multi-Cloud deployments with more visibility and control of multiple workloads in a single portal.**

Hybrid Cloud Director's seamless migration of workloads between Cloud platforms helps boost business performance and efficiency while optimizing costs.

Thrive's Hybrid Cloud Director interfaces with other back-office systems across virtualized public Cloud services, all within a single portal. The Thrive Hybrid Cloud Director Portal features a robust suite of multi-Cloud management and reporting for clients to manage and optimize their workloads.

Features:

- 24x7 monitoring capabilities, patching, management and support of fully-customizable solutions across public and private Cloud platforms.
- Hybrid Cloud Management capabilities with workflow approval controls, usage metering, reports and audit logs.
- Deploys and moves applications across multiple Clouds for extra flexibility.
- Creates a cost-effective Cloud strategy for your business using the right Cloud for the right workload.
- Single pane of glass view into Cloud services.
- View and access cost and performance reporting.
- Easily manage automated self-service capabilities for clients who prefer more direct control of their environments.
- Real-time visibility of virtual CPU, memory, storage and virtual machine usage.

The Thrive Advantage

Control Costs and Gain Value
- Eliminate the uncertainty and costly nature of infrastructure, hardware capital expenditures and refresh cycles
- Streamline operating budgets, avoid expensive and cumbersome maintenance and support renewal agreements

Gain More Flexibility
- Access your applications seamlessly and securely from anywhere
- Easily add or remove resources as your business requirements change
- Utilize multiple Cloud platforms to optimize performance and cost – all managed by Thrive's expert team of Cloud engineers

Improve Security and Resiliency
- Fully redundant and resilient Cloud architecture providing the highest levels of availability and performance
- Secured by NextGen Unified Threat Management Firewall platforms, SOC/SIEM and Distributed Denial of Service (DDoS) detection and mitigation
