

# Microsoft 365 Email & Collaboration Protection

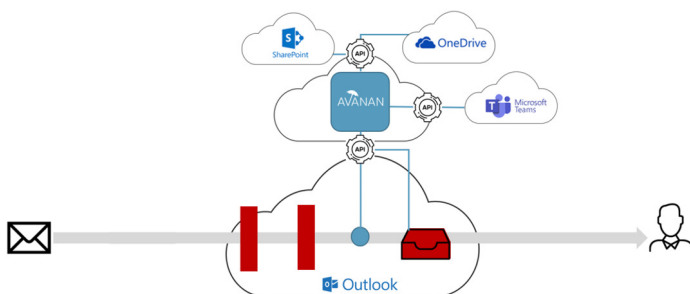

As phishing and malware attacks become more sophisticated, enhanced capabilities to detect and prevent these attacks are required.

Thrive's Managed Cloud Email and Collaboration Security for Microsoft 365 service provides advanced protection against phishing, malware and ransomware, malicious URL's, and account takeovers. The service is deployed inline to the existing mail flow and works in conjunction with native Exchange Online Security (EOS) within the Microsoft 365 platform. Utilizing machine learning and artificial intelligence, the service detects advanced phishing attempts and malware that advance past the Microsoft security layer providing a superior defense against sophisticated attacks before it is delivered to the user inbox.

The service is undetectable to malicious actors as no changes are required to redirect email, as is required with traditional Secure Email Gateway (SEG) solutions. This provides a greater level of security than a SEG solution can provide as Mail Exchange (MX) records are publicly accessible and provides information an attacker could use to attempt to exploit known weaknesses within the SEG platform to avoid detection of phishing or malware.

## Features

- Advanced cloud-based phishing detection engine utilizing Artificial Intelligence and Machine Learning
- Complete protection against phishing and malware for all email – Inbound, Outbound, and Internal.
- Invisible to potential malicious actors as no Mail Exchange (MX) record changes are required.
- Malware and URL Protection for Microsoft Collaboration (SharePoint Online, OneDrive, and Teams).
- User account anomaly detection and prevention
- Data Loss Prevention protection available

## The Thrive Advantage

### Managed Services Provider (MSP)

Thrive provides Comprehensive IT Outsourcing, delivering end-to-end managed services and unmatched expertise to drive a highly secure and successful digital transformation.

### Security Solutions

Thrive's fully-integrated managed cybersecurity solutions provide a proactive and comprehensive approach to security management for identifying and remediating security issues. Thrive's unified cybersecurity platform enables Thrive's 24x7x365 Security Operations Center to automatically address critical security issues without client intervention.

### Consulting

Thrive addresses gaps that may exist in your organization by providing a variety of expert professional and consultative services with an agnostic approach to identifying and prioritizing risk.

### Expertise

The Thrive team is composed of technical and industry experts dedicated to ensuring that customers are able to optimize their business performance through the strategic design and implementation of a NextGen IT environment.
