

The Trusted Global Technology Choice for Financial Private Equity

Revolutionizing Private Equity Transactions

Thrive provides our Private Equity customers and partners with a competitive market advantage in leveraging technology for value protection and value creation. By offering pragmatic and reasonable solutions that align with the overall investment strategy and deal by deal thesis, Thrive can deliver the expertise Private Equity firms and their portfolios demand at the speed in which they operate.

The Thrive Platform

Thrive delivers global technology outsourcing for cybersecurity, Cloud, networking, and other complex IT requirements. Thrive's NextGen platform enables customers to increase business efficiencies through standardization, scalability, and automation, delivering oversized technology returns on investment (ROI). They accomplish this with advisory services, vCISO, vCIO, consulting, project implementation, solution architects, and a best-in-class subscription-based technology platform. Thrive delivers exceptional high-touch service through its POD approach of subject matter experts and global 24x7x365 SOC, NOC, and centralized services teams.

Thrive's Value Creation and Protection Designed for PE

Acquisitions draw attention, making companies vulnerable to impersonation and phishing. Smaller to mid-market PE firms with technical debt are especially at risk due to outdated security. Immediate security analysis post-acquisition is crucial to mitigate threats promptly. Neglecting this can lead to significant financial losses, emphasizing the need for proactive cybersecurity measures to safeguard against attacks targeting newly acquired businesses.

Our unified Financial Operations Platform enables organizations to put investors at ease, as well as serves as a comprehensive tool during a potential regulatory or registration process with the FCA, MAS, HKMA, SEC, FINRA, SIPC, MSRB and NFA.

Managed Detection and Response

Critical security issues pose a 24x7 risk to the infrastructure of financial services organizations. At the same time, system and regulatory requirements demand that organizations log, monitor, analyze and report on their data as it passes through a complex network of IT infrastructure and applications. Thrive's customer-first cybersecurity approach provides custom Managed Detection and Responses (MDR) that can scale with budgets, can flexibly meet changing demands, and provides clear, actionable information.

Disaster Recovery-as-a-Service

Thrive understands that regardless of the reason, downtime for financial services firms is never an option. Whether it's an infrastructure failure, security breach, human error, or a natural disaster, your investors and clients demand your services continue to operate without interruption.

Thrive's DRaaS portfolio of services range from disaster recovery consulting and planning to full restoration of mission-critical applications and services.

Agile and Adaptive for PE Transactions

Thrive consistently conducts thorough IT operations reviews and security evaluations. In many cases involving PE firms, transactions come with technical debt and scalability challenges. Nonetheless, Thrive's agility allows for swift adjustments to the current operational landscape, ensuring seamless support and adaptability to evolving needs.

A Global Leader in Technology Support

Our PE-experienced team possesses the technical and strategic skills to navigate rapid growth scenarios, providing unparalleled support focused on value creation, protection, and PE-specific engineering and account management. Throughout the carve-out process, Thrive ensured project completion within the confines of the transitional services agreement, emphasizing the importance of effective communication and comprehensive project management.

Mission

- We know how to build partnerships at the fund level.
- We align our service strategy to mesh with your overall investment strategy AND individual deal thesis.
- We offer a pragmatic and reasonable approach around guidance and actionable execution.
- We have deep expertise around private equity engagements and understand the speed to which they must operate.

Expertise with private equity growth support across all industries

*“Our team was faced with a significant migration project, and we sought out an experienced partner to help us make the process seamless and be available as an extension of our internal team for support when needed. **Thrive ended up being the partner we were looking for – and more.**”*

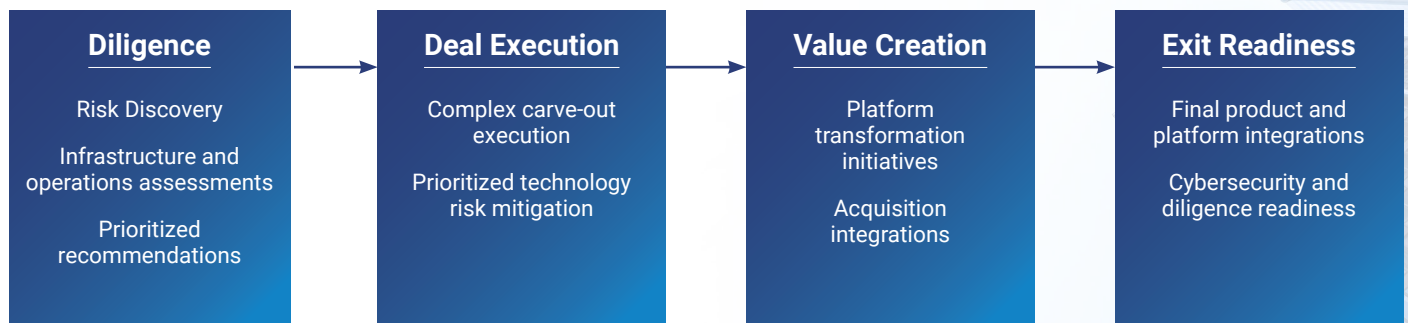

– Christopher Dukes, VP of Information Technology, Aspen Surgical

*“We decided to work with Thrive for our security and networking needs because **we were impressed with its effectiveness and knowledge** in these fields, which gave us confidence in its ability to deliver.”*

– Travis Sirmon, Director of Technology at Transmarine Navigation

Through every stage of the deal flow we bring strong leadership, broad technology experience, and deep industry knowledge. We are committed to closing deals, strengthening companies, and succeeding together.
