

Security, Orchestration, Automation & Response (SOAR)

Thrive adds SOAR (Security Orchestration, Automation and Response) to its robust Security Operations Center to identify cyberattacks and respond to threats up to 98% faster than manual operations.

With cybertheft costs climbing to nearly \$10.5 trillion each year, businesses must be armed with innovative ways to protect their data. That's why Thrive has upgraded its Security Operations Center (SOC) to offer a faster, more sophisticated and more coordinated response to ever-evolving threats.

Thrive SOCs add SOAR

The integration of SOAR (Security Orchestration, Automation, and Response) to Thrive's Security Operation Center (SOC) enhances cyber threat detection in real-time. SOAR aggregates all cybersecurity event data, unifies operations and reduces the mean time to respond to critical incidents.

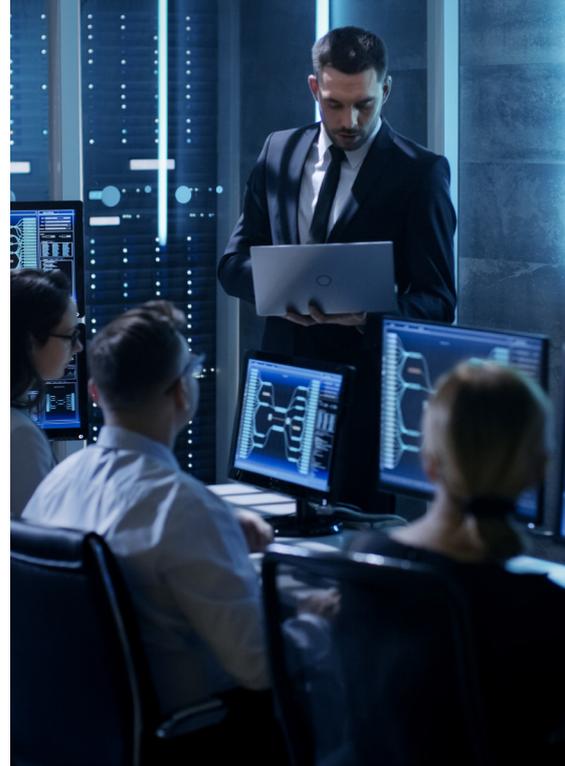

SOAR and SIEM

Integrating automation into your cybersecurity processes helps streamline routine activities, such as vulnerability management or event log analysis, and helps teams prioritize threats and respond to attacks.

SOAR directly complements Thrive's Managed SIEMaaS, enabling more streamlined responses to common issues. SIEMaaS collects data and discovers threat events, then SOAR analyzes that data and carries out pre-planned, automated responses.

SOAR Benefits Include:

- Faster Threat Response Times
- Optimized Threat Intelligence
- Standardized Automated Processes
- Reduced Attack Impact
- Decreased Need for Manual Routine Processes
- Reduced Alert Fatigue
- Reduced Context Switching
- Unifies Operations, Tools and Data

The Thrive Advantage

Managed Services Provider (MSP)

Thrive provides Comprehensive IT Outsourcing, delivering end-to-end managed services and unmatched expertise to drive a highly secure and successful digital transformation.

Security Solutions

Thrive's fully-integrated managed cybersecurity solutions provide a proactive and comprehensive approach to security management for identifying and remediating security issues. Thrive's unified cybersecurity platform enables Thrive's 24x7x365 Security Operations Center to automatically address critical security issues without client intervention.

Consulting

Thrive addresses gaps that may exist in your organization by providing a variety of expert professional and consultative services with an agnostic approach to identifying and prioritizing risk.

Expertise

The Thrive team is composed of technical and industry experts dedicated to ensuring that customers are able to optimize their business performance through the strategic design and implementation of a NextGen IT environment.
