SERVICES

- ◆ ThriveCloud
- ◆ Cisco networking and collaboration
- ◆ Data centre migration
- ◆ FlexPod solution that incorporates Cisco UCS, NetApp and VMware
- ◆ Global Network Management
- ◆ Remote hands
- ◆ Data centre hosted tours

CHALLENGE

The global IT-based services partner in digital solutions, software applications and managed services was looking to consolidate its 5 data centres and providers across the UK. The organisation searched for a provider that could support its current business with the ability to scale to meet the predicted growth of its Cloud-based business. It required a partner that could provide a highly secure Tier 3+ data centre to locate its systems and provide a safe, resilient and high-performance connectivity, which is crucial to meet the SLAs of its customers.

SOLUTION

Thrive provided the organisation with a two dedicated pods in its secure data centre consisting of 56 racks and enabled the migration of its legacy network systems. Thrive also delivered high-speed connectivity between the company's second data centre and UK offices with a 10Gb network infrastructure that includes connectivity to the Public Service Network (PSN). In addition, Thrive implemented a 24x7 intelligent remote hands capability in which Thrive's data centre experts are available 24x7 to assist with reactive or proactive maintenance ranging from swapping a cable to replacing core system components.

RESULT

The data centre migration to Thrive's facilities provided the company flexibility in a cost-effective manner aligning expenditure with revenue. In addition, the organization experienced a highly-resilient environment that delivers a guaranteed 100% uptime; a Tier 3+ data centre that is highly secure and operates to ISO27001 standards; onsite expertise with remote hands assistance to maintain customer services; the capacity to scale with future growth; and the ability to provide expert hosted tours of the facility - an important peace of mind to customers.

How can Thrive help your business?

Thrive is a leading provider of outsourced IT Infrastructure designed to drive business outcomes by helping you get the most out of your IT.
